

# Version 3.05.03.00

## What's in this release

- Delivery drivers can now scan returns on NAPA Delivery Tracker tablets and submit them to TAMS II. The store then needs to confirm each part and complete the return.
- Commercial customers (with an existing customer account number) no longer need to call their local store when registering on PROLink. The customer account number is automatically updated in the **Phone file** allowing customers to buy parts immediately.

See below for details on all improvements and fixes in this release.
